Fact Sheet

Bethany Home Assisted Living opened March 25, 2014.

There are twenty apartments in the facility; four 2-bedroom apartments, eight 1-bedroom apartments and eight studio apartments. If needed, a 2-bedroom suite can be created by utilizing an adjoining door between a studio and a 1-bedroom apartment (limited options available).

The Assisted Living is staffed at all times by Certified Medication Aide(s) (CMA). A Licensed Practical Nurse (LPN) is in the facility Monday through Friday during business hours and is on call 24/7. A Registered Nurse (RN) is also available throughout the week and on call 24/7. Staff provide monthly vital signs checks and weight checks free of charge. Additional nursing services may be purchased, as necessary.

Rent at the Assisted Living includes three meals per day (cooked in-house), weekly apartment cleaning, and linen changes. All utilities are paid except personal phone services and cable TV programming.

Additional nursing services are available, based on resident need/preference and may include: medication set-up or management/administration, pacemaker checks, assistance with showering, nail care, blood sugar monitoring, personal laundry service, whirlpool baths, and cueing/reminders for activities of daily living (ADLs). Services are purchased on a "point" system; a resident may have up to 3 points with no additional charge. There are three point levels, with incremental increases in charges for additional services needed.

Transportation within 25 miles of the facility is free of charge. The city of Lindsborg 'Dala bus' provides transportation within a 7 mile radius and will pick up at the Assisted Living. Residents may schedule trips via the Dala bus as needed, Monday through Friday. Residents may also opt to have their families (or staff, depending on availability) assist with transportation or drive their own vehicles, if able.

Criteria that must be met to be able to live in an Assisted Living Facility:

- ◆ No ongoing condition requiring a two-person transfer
- ◆ If mobility is an issue, the resident must be able to exit the building without need for total assistance.
- ◆ If incontinent, the resident must be able to participate in management of the incontinence.
- ◆ No ongoing skilled nursing need, requiring 24/7 nursing intervention
- ◆ No behavioral symptoms that exceed manageability or require use of a restraint.

Medicare benefits are available under outpatient or part B benefits. Hospice services will require family or Hospice staff support per the individual's need and may require a more intensive level of care, such as our long-term care facility.

Currently, Medicaid or HCBS are not funding sources for our Assisted Living, however some long term care insurances do provide funding, if a physician can support the need for this level of care. Private resources are our main source of payment.
